Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
```

```
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Claim 24; SEQ ID NO 55; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline N-terminal single chain IL-12p40 protein
CC   encoding cDNA.

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,
CC multimeric forms of these proteins, an antibody against these proteins,
CC or an inhibitor identified by its ability to inhibit the activity of
CC these proteins, can be used to treat or prevent autoimmune diseases,
CC allergic reactions, infectious diseases, tumour development, inflammatory
CC diseases and/or graft rejection in animals. The present nucleic acid
CC sequence represents a feline interleukin 12 DNA sequence, as described in
CC the invention

PT New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT p40 subunit protein and a nucleic acid linker, useful in preparing a
PT vaccine against infectious diseases in feline animals.
XX
PS Claim 23; SEQ ID NO 29; 103pp; English.

XX
CC The present invention relates to the feline interleukin (IL)-12p35 or p40
CC subunit protein and their encoding nucleic acid molecules and a nucleic
CC acid linker. The invention also provides the feline caspase (casp)-1,
CC feline IL-18 single chain and canine IL-12 single chain proteins and
CC their nucleic acid molecules. The nucleic acid molecule is useful in
CC preparing a vaccine against infectious diseases in feline animals. The
CC present sequence is the feline single chain IL-12p40 subunit protein
CC encoding full-length cDNA.

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 3; SEQ ID NO 31; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline single chain IL-12p40 subunit full-length
CC   complementary DNA.

PT   Vaccine for treating or preventing lentivirus infection in cats, contains
PT   nucleic acid sequence encoding viral protein under control of eukaryotic
PT   promoter.
XX
PS   Claim 14; Page 36; 37pp; German.
XX
CC   This invention describes a novel vaccine (A) for prevention or treatment
CC   of lentivirus infection in felines which comprises an immunizing nucleic
CC   acid sequence (I) that contains, or comprises, at least part of a gene
CC   encoding a protein (II) of the virus, under control of a eukaryotic
CC   promoter functional in the relevant animal. (II) is especially the
CC   envelope (env) protein. The invention also describes (1) vaccine (A)
CC   containing an immunizing protein, or fragment, from a lentivirus plus at
CC   least one of interleukin (IL)-12 and/or -16; and (2) preparation of a
CC   lentivirus protein, or fragment, especially derived from feline immune
CC   deficiency virus (FIV), by expressing the corresponding nucleic acid
CC   sequence in a host cell. The products of the invention have antiviral
CC   activity. The vaccine (A) and related protein-based vaccines, are
CC   particularly used to treat or prevent lentivirus infections in domestic
CC   cats, especially feline immune deficiency virus (FIV). Vaccination with
CC   (A) allows differentiation between vaccinated and infected animals, from
CC   the antibody status. The vaccines may be formulated with an adjuvant
CC   (particularly interleukin-12 and/or IL-16) that elicits a cytotoxic
CC   immune response, particularly a Th1 response

PT Recombinant feline interleukin-12, useful as immunostimulant and for
PT treating e.g. viral infections in cats, and related nucleic acid
PT constructs.
XX
PS Claim 3; Page 30; 35pp; German.
XX
CC This invention describes a novel feline interleukin-12 (fIL-12)
CC polypeptide (I) that is expressed, by recombinant gene expression in
CC eukaryotic or prokaryotic cells, in the form of both polypeptide chains
CC of subunits p35 and p40. These proteins are formed so that, in equimolar
CC concentrations and in presence of an immunizing antigen, they can be
CC administered to carnivores, particularly domestic cats. The invention
CC also describes a nucleic acid construct (II) encoding fIL-12 containing
CC sequences at least 95% identical with the p40- and p35-encoding sequences
CC (A, 990 bp and B, 669 bp respectively), reproduced in the specification,
CC as immunostimulants for immunization against infectious diseases and/or
CC for treating infections or tumors in felines, especially domestic cats.
CC The products of the invention have immunostimulatory, antiviral and
CC antitumor activity. Nucleic acid constructs that encode (II) are useful
CC as adjuvants for prophylactic immunization against viral diseases and for
CC treating diseases associated with a Th1 defect. IL-12 induces synthesis
CC of interferon gamma (Th1 response). The feline interleukin-12 polypeptide
CC is useful for carnivores, and particularly domestic cats in the
CC following: (i) as immunostimulant, for preventative or therapeutic use;
CC and (ii) treating tumors and autoimmune diseases, or diseases associated
CC with a Th1 defect, especially pre-existing infections by feline immune
CC deficiency virus (FIV), feline leukemia virus and corona virus

PT   Vaccine for treating or preventing lentivirus infection in cats, contains
PT   nucleic acid sequence encoding viral protein under control of eukaryotic
PT   promoter.
XX
PS   Disclosure; Page 29-31; 37pp; German.
XX
CC   This invention describes a novel vaccine (A) for prevention or treatment
CC   of lentivirus infection in felines which comprises an immunizing nucleic
CC   acid sequence (I) that contains, or comprises, at least part of a gene
CC   encoding a protein (II) of the virus, under control of a eukaryotic
CC   promoter functional in the relevant animal. (II) is especially the
CC   envelope (env) protein. The invention also describes (1) vaccine (A)
CC   containing an immunizing protein, or fragment, from a lentivirus plus at
CC   least one of interleukin (IL)-12 and/or -16; and (2) preparation of a
CC   lentivirus protein, or fragment, especially derived from feline immune
CC   deficiency virus (FIV), by expressing the corresponding nucleic acid
CC   sequence in a host cell. The products of the invention have antiviral
CC   activity. The vaccine (A) and related protein-based vaccines, are
CC   particularly used to treat or prevent lentivirus infections in domestic
CC   cats, especially feline immune deficiency virus (FIV). Vaccination with
CC   (A) allows differentiation between vaccinated and infected animals, from
CC   the antibody status. The vaccines may be formulated with an adjuvant
CC   (particularly interleukin-12 and/or IL-16) that elicits a cytotoxic
CC   immune response, particularly a Th1 response

XX
PT   Recombinant feline interleukin-12, useful as immunostimulant and for
PT   treating e.g. viral infections in cats, and related nucleic acid
PT   constructs.
XX
PS   Example 1c; Page 33-35; 35pp; German.
XX
CC   This invention describes a novel feline interleukin-12 (fIL-12)
CC   polypeptide (I) that is expressed, by recombinant gene expression in
CC   eukaryotic or prokaryotic cells, in the form of both polypeptide chains
CC   of subunits p35 and p40. These proteins are formed so that, in equimolar
CC   concentrations and in presence of an immunizing antigen, they can be
CC   administered to carnivores, particularly domestic cats. The invention
CC   also describes a nucleic acid construct (II) encoding fIL-12 containing
CC   sequences at least 95% identical with the p40- and p35-encoding sequences
CC   (A, 990 bp and B, 669 bp respectively), reproduced in the specification,
CC   as immunostimulants for immunization against infectious diseases and/or
CC   for treating infections or tumors in felines, especially domestic cats.
CC   The products of the invention have immunostimulatory, antiviral and
CC   antitumor activity. Nucleic acid constructs that encode (II) are useful
CC   as adjuvants for prophylactic immunization against viral diseases and for
CC   treating diseases associated with a Th1 defect. IL-12 induces synthesis
CC   of interferon gamma (Th1 response). The feline interleukin-12 polypeptide
CC   is useful for carnivores, and particularly domestic cats in the
CC   following: (i) as immunostimulant, for preventative or therapeutic use;
CC   and (ii) treating tumors and autoimmune diseases, or diseases associated
CC   with a Th1 defect, especially pre-existing infections by feline immune
CC   deficiency virus (FIV), feline leukemia virus and corona virus

PT   Novel feline cytokine protein - useful for treating feline auto:immune
PT   diseases, e.g. those caused by feline herpes virus or feline calcivirus.
XX
PS   Claim 19; Page 52-54; 94pp; Japanese.
XX
CC   This sequence encodes a novel feline cytokine protein, FLAFp40. This
CC   protein can be used in the production of a FLAFp35/FLAFp40 heterodimer
CC   which can potentiate the cytotoxic activity of feline cytotoxic T
CC   lymphocyte cells. Such proteins are used for treatment of feline
CC   autoimmune diseases e.g. as caused by feline herpes virus or feline
CC   calcivirus

XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain

```
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Claim 24; SEQ ID NO 38; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline single chain IL-12 protein encoding cDNA.

XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

PT New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT p40 subunit protein and a nucleic acid linker, useful in preparing a
PT vaccine against infectious diseases in feline animals.
XX
PS Example 3; SEQ ID NO 45; 103pp; English.
XX
CC The present invention relates to the feline interleukin (IL)-12p35 or p40
CC subunit protein and their encoding nucleic acid molecules and a nucleic
CC acid linker. The invention also provides the feline caspase (casp)-1,
CC feline IL-18 single chain and canine IL-12 single chain proteins and
CC their nucleic acid molecules. The nucleic acid molecule is useful in
CC preparing a vaccine against infectious diseases in feline animals. The
CC present sequence is the feline single chain IL-12 complementary DNA.

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,
CC multimeric forms of these proteins, an antibody against these proteins,
CC or an inhibitor identified by its ability to inhibit the activity of
CC these proteins, can be used to treat or prevent autoimmune diseases,
CC allergic reactions, infectious diseases, tumour development, inflammatory
CC diseases and/or graft rejection in animals. The present nucleic acid

```
CC   sequence represents a canine interleukin 12 DNA sequence, as described in
CC   the invention

PT New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT p40 subunit protein and a nucleic acid linker, useful in preparing a
PT vaccine against infectious diseases in feline animals.
XX
PS Example 4; SEQ ID NO 63; 103pp; English.
XX
CC The present invention relates to the feline interleukin (IL)-12p35 or p40
CC subunit protein and their encoding nucleic acid molecules and a nucleic
CC acid linker. The invention also provides the feline caspase (casp)-1,
CC feline IL-18 single chain and canine IL-12 single chain proteins and
CC their nucleic acid molecules. The nucleic acid molecule is useful in
CC preparing a vaccine against infectious diseases in feline animals. The
CC present sequence is the canine single chain IL-12 complementary DNA.

XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a canine interleukin 12 DNA sequence, as described in
CC   the invention

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 4; SEQ ID NO 68; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the canine single chain IL-12 complementary DNA.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

/note="Vector: pDNR-Dual; Site_1: loxP-SalI; Site_2:

loxP-HindIII; Clones from this library have been PCR-amplified using gene-specific primers to contain the complete open reading frame (based on known gene sequences available from NCBI's RefSeq). Template for PCR is cDNA derived from either pooled cytoplasmic polyA RNA from 30 cells lines or pooled total RNA from 10 different tissues (from BD Biosciences/Clontech and Washington University). PCR products are directionally cloned into the loxP sites of the pDNR-Dual vector. Library constructed by Dr. Narayan Bhat, Earl Bere III and Hongling Liao (Gene Expression Laboratory, Research Technology Program, SAIC Frederick, NCI-Frederick, Frederick, MD 21702). For information on which gene each clone represents, please visit our anonymous ftp site at ftp://image.llnl.gov/image/rearrayed_plates/IRBK.preSV.dat a Note: this is a NIH_MGC Library."

TITLE Direct Submission
JOURNAL Submitted (30-MAR-2004) Yoshihide Hayashizaki, The Institute of Physical and Chemical Research (RIKEN), Laboratory for Genome Exploration Research Group, RIKEN Genomic Sciences Center (GSC), RIKEN Yokohama Institute; 1-7-22 Suehiro-cho, Tsurumi-ku, Yokohama, Kanagawa, 230-0045, Japan (E-mail:genome-res@gsc.riken.jp, URL:http://genome.gsc.riken.jp/, Tel:81-45-503-9222, Fax:81-45-503-9216)
COMMENT cDNA library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken Genomic Sciences Center and Genome Science Laboratory in RIKEN. Division of Experimental Animal Research in Riken contributed to prepare mouse tissues.
Tissues were provided by Dr. John Todd (Dept. of Medical Genetics Wellcome Trust Centre for Molecular Mechanisms in Disease Wellcome Trust/MRC building Addenbrookes Hospital Cambridge) whose assistance we gratefully acknowledge.
Please visit our web site for further details.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Claim 24; SEQ ID NO 38; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline single chain IL-12 protein encoding cDNA.

CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,
CC multimeric forms of these proteins, an antibody against these proteins,
CC or an inhibitor identified by its ability to inhibit the activity of
CC these proteins, can be used to treat or prevent autoimmune diseases,
CC allergic reactions, infectious diseases, tumour development, inflammatory
CC diseases and/or graft rejection in animals. The present nucleic acid
CC sequence represents a feline interleukin 12 DNA sequence, as described in
CC the invention

PT New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT p40 subunit protein and a nucleic acid linker, useful in preparing a

```
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 3; SEQ ID NO 45; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline single chain IL-12 complementary DNA.

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Claim 24; SEQ ID NO 43; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline single chain IL-12 protein encoding cDNA.

XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a canine interleukin 12 DNA sequence, as described in
CC   the invention

PT   Feline interleukin 18 (IL-18), feline caspase-1, feline IL-12 single
PT   chain and canine IL-12 single chain proteins, useful for treating and
PT   preventing autoimmune diseases, inflammatory diseases and/or graft
PT   rejection in animals.
XX
PS   Claim 6; Page 82-83; 106pp; English.
XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a canine interleukin 12 DNA sequence, as described in
CC   the invention

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 4; SEQ ID NO 63; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the canine single chain IL-12 complementary DNA.

XX
PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 4; SEQ ID NO 61; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the canine single chain IL-12 protein encoding cDNA.

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,

```
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a canine interleukin 12 DNA sequence, as described in
CC   the invention

XX
PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 4; SEQ ID NO 68; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the canine single chain IL-12 complementary DNA.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

ALIGNMENTS

RESULT 1
AK162981
LOCUS AK162981 1839 bp mRNA linear HTC 21-SEP-2005
DEFINITION Mus musculus 0 day neonate thymus cDNA, RIKEN full-length enriched library, clone:A430014H12 product:interleukin 12b, full insert sequence.
ACCESSION AK162981
VERSION AK162981.1 GI:74188061
KEYWORDS HTC; CAP trapper.
SOURCE Mus musculus (house mouse)
ORGANISM Mus musculus
Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Sciurognathi; Muroidea; Muridae; Murinae; Mus.

TITLE Direct Submission

JOURNAL Submitted (30-MAR-2004) Yoshihide Hayashizaki, The Institute of Physical and Chemical Research (RIKEN), Laboratory for Genome Exploration Research Group, RIKEN Genomic Sciences Center (GSC), RIKEN Yokohama Institute; 1-7-22 Suehiro-cho, Tsurumi-ku, Yokohama, Kanagawa, 230-0045, Japan (E-mail:genome-res@gsc.riken.jp, URL:http://genome.gsc.riken.jp/, Tel:81-45-503-9222, Fax:81-45-503-9216)

COMMENT cDNA library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken Genomic Sciences Center and Genome Science Laboratory in RIKEN. Division of Experimental Animal Research in Riken contributed to prepare mouse tissues.
Tissues were provided by Dr. John Todd (Dept. of Medical Genetics Wellcome Trust Centre for Molecular Mechanisms in Disease Wellcome Trust/MRC building Addenbrookes Hospital Cambridge) whose assistance we gratefully acknowledge.
Please visit our web site for further details.

US-09-917-265A-68/c
; Sequence 68, Application US/09917265A
; Patent No. 6818444
; GENERAL INFORMATION:
;  APPLICANT: Wonderling, Ramani S.
;  APPLICANT:  Boroughs, Karen L.
;  TITLE OF INVENTION: CANINE AND FELINE PROTEINS, NUCLEIC ACID MOLECULES AND USES
;  TITLE OF INVENTION:  THEREOF
;  FILE REFERENCE: IM-5
;  CURRENT APPLICATION NUMBER: US/09/917,265A
;  CURRENT FILING DATE:  2001-07-27
;  PRIOR APPLICATION NUMBER: 60/223,016
;  PRIOR FILING DATE: 2000-08-04
;  NUMBER OF SEQ ID NOS: 111
;  SOFTWARE: PatentIn version 3.2
; SEQ ID NO 68
;   LENGTH: 1533
;   TYPE: DNA
;   ORGANISM: Canis familiaris
US-09-917-265A-68

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,

```
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

PT New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT p40 subunit protein and a nucleic acid linker, useful in preparing a
PT vaccine against infectious diseases in feline animals.
XX
PS Example 3; SEQ ID NO 45; 103pp; English.
XX
CC The present invention relates to the feline interleukin (IL)-12p35 or p40
CC subunit protein and their encoding nucleic acid molecules and a nucleic
CC acid linker. The invention also provides the feline caspase (casp)-1,
CC feline IL-18 single chain and canine IL-12 single chain proteins and
CC their nucleic acid molecules. The nucleic acid molecule is useful in
CC preparing a vaccine against infectious diseases in feline animals. The
CC present sequence is the feline single chain IL-12 complementary DNA.

XX
CC   The present invention discloses new feline interleukin 18 (IL-18), feline
CC   caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC   proteins. A composition comprising a feline IL-18, feline caspase-1,
CC   feline IL-12 single chain or canine IL-12 single chain proteins, a
CC   nucleic acid encoding these proteins, mimetopes of these proteins,
CC   multimeric forms of these proteins, an antibody against these proteins,
CC   or an inhibitor identified by its ability to inhibit the activity of
CC   these proteins, can be used to treat or prevent autoimmune diseases,
CC   allergic reactions, infectious diseases, tumour development, inflammatory
CC   diseases and/or graft rejection in animals. The present nucleic acid
CC   sequence represents a feline interleukin 12 DNA sequence, as described in
CC   the invention

PT   New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Claim 24; SEQ ID NO 38; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the feline single chain IL-12 protein encoding cDNA.

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,
CC multimeric forms of these proteins, an antibody against these proteins,
CC or an inhibitor identified by its ability to inhibit the activity of
CC these proteins, can be used to treat or prevent autoimmune diseases,
CC allergic reactions, infectious diseases, tumour development, inflammatory
CC diseases and/or graft rejection in animals. The present nucleic acid
CC sequence represents a canine interleukin 12 DNA sequence, as described in
CC the invention

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,
CC multimeric forms of these proteins, an antibody against these proteins,
CC or an inhibitor identified by its ability to inhibit the activity of
CC these proteins, can be used to treat or prevent autoimmune diseases,
CC allergic reactions, infectious diseases, tumour development, inflammatory
CC diseases and/or graft rejection in animals. The present nucleic acid

CC sequence represents a canine interleukin 12 DNA sequence, as described in
CC the invention

PT New nucleic acid molecule comprising a sequence encoding a feline p35 or

```
PT   p40 subunit protein and a nucleic acid linker, useful in preparing a
PT   vaccine against infectious diseases in feline animals.
XX
PS   Example 4; SEQ ID NO 68; 103pp; English.
XX
CC   The present invention relates to the feline interleukin (IL)-12p35 or p40
CC   subunit protein and their encoding nucleic acid molecules and a nucleic
CC   acid linker. The invention also provides the feline caspase (casp)-1,
CC   feline IL-18 single chain and canine IL-12 single chain proteins and
CC   their nucleic acid molecules. The nucleic acid molecule is useful in
CC   preparing a vaccine against infectious diseases in feline animals. The
CC   present sequence is the canine single chain IL-12 complementary DNA.

XX
CC The present invention discloses new feline interleukin 18 (IL-18), feline
CC caspase-1, feline IL-12 single chain and canine IL-12 single chain
CC proteins. A composition comprising a feline IL-18, feline caspase-1,
CC feline IL-12 single chain or canine IL-12 single chain proteins, a
CC nucleic acid encoding these proteins, mimetopes of these proteins,
CC multimeric forms of these proteins, an antibody against these proteins,
CC or an inhibitor identified by its ability to inhibit the activity of
CC these proteins, can be used to treat or prevent autoimmune diseases,
CC allergic reactions, infectious diseases, tumour development, inflammatory
CC diseases and/or graft rejection in animals. The present nucleic acid
CC sequence represents a canine interleukin 12 DNA sequence, as described in
CC the invention

XX
PT New nucleic acid molecule comprising a sequence encoding a feline p35 or
PT p40 subunit protein and a nucleic acid linker, useful in preparing a
PT vaccine against infectious diseases in feline animals.
XX
PS Example 4; SEQ ID NO 63; 103pp; English.
XX
CC The present invention relates to the feline interleukin (IL)-12p35 or p40
CC subunit protein and their encoding nucleic acid molecules and a nucleic
CC acid linker. The invention also provides the feline caspase (casp)-1,
CC feline IL-18 single chain and canine IL-12 single chain proteins and
CC their nucleic acid molecules. The nucleic acid molecule is useful in
CC preparing a vaccine against infectious diseases in feline animals. The
CC present sequence is the canine single chain IL-12 complementary DNA.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```

loxP-HindIII; Clones from this library have been PCR-amplified using gene-specific primers to contain the complete open reading frame (based on known gene sequences available from NCBI's RefSeq). Template for PCR is cDNA derived from either pooled cytoplasmic polyA RNA from 30 cells lines or pooled total RNA from 10 different tissues (from BD Biosciences/Clontech and Washington University). PCR products are directionally cloned into the loxP sites of the pDNR-Dual vector. Library constructed by Dr. Narayan Bhat, Earl Bere III and Hongling Liao (Gene Expression Laboratory, Research Technology Program, SAIC Frederick, NCI-Frederick, Frederick, MD 21702). For information on which gene each clone represents, please visit our anonymous ftp site at ftp://image.llnl.gov/image/rearrayed_plates/IRBK.preSV.dat a Note: this is a NIH_MGC Library."

                     complete open reading frame (based on known gene sequences
                     available from NCBI's RefSeq). Template for PCR is cDNA
                     derived from either pooled cytoplasmic polyA RNA from 30
                     cells lines or pooled total RNA from 10 different tissues
                     (from BD Biosciences/Clontech and Washington University).
                     PCR products are directionally cloned into the loxP sites
                     of the pDNR-Dual vector. Library constructed by Dr.
                     Narayan Bhat, Earl Bere III and Hongling Liao (Gene
                     Expression Laboratory, Research Technology Program, SAIC
                     Frederick, NCI-Frederick, Frederick, MD 21702). For

            Fax:81-45-503-9216)
COMMENT     cDNA library was prepared and sequenced in Mouse Genome
            Encyclopedia Project of Genome Exploration Research Group in Riken
            Genomic Sciences Center and Genome Science Laboratory in RIKEN.
            Division of Experimental Animal Research in Riken contributed to
            prepare mouse tissues.
            Tissues were provided by Dr. John Todd (Dept. of Medical Genetics
            Wellcome Trust Centre for Molecular Mechanisms in Disease Wellcome
            Trust/MRC building Addenbrookes Hospital Cambridge) whose
            assistance we gratefully acknowledge.
            Please visit our web site for further details.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

; Sequence 66, Application US/09917265
; Patent No. US20020052030A1
```

```
; GENERAL INFORMATION:
;  APPLICANT: Wonderling, Ramani S.
;  APPLICANT:  Boroughs, Karen L.
;  TITLE OF INVENTION: CANINE AND FELINE PROTEINS, NUCLEIC ACID MOLECULES AND USES THERE
;  FILE REFERENCE: IM-5
;  CURRENT APPLICATION NUMBER: US/09/917,265
;  CURRENT FILING DATE:  2001-07-27
;  PRIOR APPLICATION NUMBER: 60/223,016
;  PRIOR FILING DATE: 2000-08-04
;  NUMBER OF SEQ ID NOS: 109
;  SOFTWARE: PatentIn version 3.1
; SEQ ID NO 66
;   LENGTH: 1533
;   TYPE: DNA
;   ORGANISM: Canis familiaris
;   FEATURE:
;   NAME/KEY: CDS
;   LOCATION: (1)..(1533)
;   OTHER INFORMATION:
US-09-917-265-66

  Query Match             89.6%;  Score 1373;  DB 3;  Length 1533;
